

Introduction:

We the “**Quality Control Services**” provides all types of technical solutions, under one roof, since more than ten years. We provide services to Pharmaceutical Industries, Pharma Distributors, Food Industries, Mineral Water plants, Education Institutes, Pharmaceutical warehouses, Hospitals and Research Institutes.

ISLAMABAD OFFICE

Offic "C", 1st Floor, Nadir Plaza, Gate No.2, DHA Phase II, Main G.T Road, Islamabad, Pakistan,
Ph: 051-5709243, Cell:03335266408,
email:info@qcslab.com, www.qcslab.com

LAHORE OFFICE

Khan Arcade,2nd Floor, Unit 5, 16-Edwards Road, Lahore, Pakistan,
Ph: 042-37357010, Cell:03315175995
email:info@qcslab.com, www.qcslab.com

Calibrations:

Calibration of an instrument is needed to ensure readings from an instrument are consistent with standard measurements, to determine the accuracy of the instrument readings and establish the reliability of the instrument i.e. that it can be trusted.

We offer calibration services to the industry to certify their instruments to establish data integrity, by using NIST traceable standard materials and master calibrators.

Validations:

We offer services of Validations, like Process Validations, Method Validations, Cleaning Validations and Equipment Qualifications, including Installation Qualification (IQ), Operational Qualifications (OQ) and Performance Qualification (PQ), in the Government Organizations and industrial sector, especially in the pharmaceutical and food industry and hospitals. All calibrations and Validations are performed by the master calibrators of high quality and calibrated/ certified from international accredited Laboratory which is traceable to international standards (NIST). We have an ambition to give services with high quality in a minimum time.

Thermal Mapping:

The purpose of Thermal mapping study is to document and control the temperature distribution within a storage area, cold room, freezer rooms or other temperature-controlled stores.

Temperature mapping is important for businesses and organizations dealing with temperature sensitive products, like biochemical products such as medicines and vaccines, and all kinds of fresh and treated foods, especially fruit and vegetables, frozen foods, dairy and meat products. This is supported by using ongoing monitoring systems.

Analytical Laboratory Equipment:

We also deal in designing the Quality Control Laboratories, Supply of all types of analytical equipments like HPLC, FTIR, Spectrophotometers, Balances and other analytical equipments used in Pharmaceutical Quality Control laboratories and Research Institutes. Their installations, Training, complete back-up support and maintenance is also provided to the customers.

LabTron is brand of QCS for laboratory equipment manufacturing, established in year 2010. Stability chamber, Column oven, Laminar Flow Hoods and Sampling Booth.

Repair/ Service Maintenance & Backup Support:

We offer Repair/ Service maintenance of all types of laboratory equipment. We have well equipped Maintenance Lab in our premises, in which highly trained engineers perform their job to give best maintenance services to our valued customers.

ISO certifications:

We are also offering services of consultancy, Trainings, complete documentation for the preparation ISO certifications, Auditing and certification from a worldwide well renowned, UK Based organization, ISOQAR. We are offering consultancy for all three certifications like ISO9001-2015, ISO 14001, ISO45001, ISO22000 and HACCP certifications. To conduct these activities, we have a team of highly qualified and seasoned technical staff, who facilitate you in complete certification process.

Trainings:

We also offer on site and in-house trainings for ISO Introduction, Internal Quality Auditing, GMP and Documentation. We also Conduct Equipment Operational training in Pharmaceutical industry. Technical Trainings on ICH Guidelines, WHO guidelines and CTD, are also conducted as per client's requirement.
